COSC 121
Spring 2019
Assignment 5

Due February 28, 2019

* 10.3
* 10.10

* 10.12 with the following modification: (i) Redraw Figure 10.6 to show the execution flow to include the interrupt from device D. (ii) Figure 10.6 (c) shows the supervisor stack at the time when interrupt handler for device C starts executing. You only need to draw the supervisor stack at the time when interrupt handler for device D starts executing. Stack at other points in time need not be shown.

* 14.8
* 14.10

Material pertaining to the last two questions will be covered in the lecture on 2/21/2019.
