1	The homework and in-class material was manageable. The projects were so difficult and it was hard to get help. With coding projects there need to be multiple TAs with office hours throughout the week.	Q
2	Professor Nitin teaches at a very fast pace. I found it hard to keep up with him most of the time. He is a very nice man and is always glad to help explain concepts outside of class. I just think if he slows down a little bit and draws his diagrams on the board slower, students would benefit. Thank you for a great semester.	Q

4	After the change of teachers, the work load became more manageable.	Q

1	MIPS powerpoint slides were especially helpful.	
2	I learned a lot in this class. I had a steep learning curve after 120.	
3	I feel like I've retained very little from this course. I have no interest in the hardware aspect of computer science. After I take the exams, I'm sure that I will forget a lot of what I studied.	
4	Good class, but I think the fact that it is being combined with Hardware is a good idea

1	Professor Vaidya was always prepared and replied quickly and clarified all of my questions.	
2	One of the best CS lectures we have at Georgetown. Knows the material extremely well. Glad to have Professor Vaidya as the new department chair!	
3	Great Professor who knows his stuff.	
4	Extremely smart guy, really good at explaining concepts and will give you extra help if you need it at office hours.
