1 If you'd prefer students read/review the content in more depth, I'd recommend a longer summary length requirement - 100 words was hardly enough to broadly state what the paper was about. This meant I was often able to complete the weekly summary assignments by reading the abstract, introduction and sometimes the conclusion.

1 Another thing I found particularly useful in other seminar settings was when students were required to post two unique questions about the paper /concepts they didn't really understand, that they wanted the presenter to cover.
 Questions were to be posted on a specified online spreadsheet and were due two days before the class met. This gave the presenter a chance to adjust their talk/slides to address other students' questions and ensured everyone had at least skimmed the papers before the class met.
