What are 1 to 3 specific elements about the course or instructor that especially helped to support your learning?

| Comments |
|---|
| Patient through the learning process, clear communicator lenient. |
| Lectures were great |
| Posting the slides was very helpful. The professor was also very available for additional help. |
| Very structured lecture notes, lots of engagement when speaking, and very relevant homework. |

Do you have any specific recommendations for improving this course?

| Comments |
|---|
| Not particularly. |
| I think having more clear wording on assignments and exams would be helpful. I felt like several mistakes I made in the course could have been avoided if the questions were worded more clearly. |
| Idk, but to the registrar: please don't schedule a class at 8:00 AM in the Car Barn again :P |

Comments
Have the course at a later time.
Course design was good. It may have been nice to see more programming applications.
Very solid design.

Please comment on assignments and grading

Comments
System was quite effective. It was incredibly fair. Homework deadlines and coursework and questions asked.
The first exam was graded a little overly harshly with minimal partial credit compared to the assignments and first exam.
I only wish that I'd been more careful with the homework and gotten some more points!

Felt like an excellent space to ask questions.
Having a small class definitely helped me to engage more.

Minimal, not as much as I would like. My credit load was stack. If smaller I could have done better
